## DETAILED ACTION

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on December 24, 2003 has been entered. **Claims 1- 48 are pending of which 8, 15, 33, and 45 have been withdrawn.**

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 9-14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 9-14 are, either directly or indirectly, dependent on claim 1 and recite that "the base layer contains a diffuser dispersed therein" which "has an average particle diameter of 0.2 to 100 microns" and is present in an amount between "0.1 to 60% by weight based on the weight of the base layer". However, it is unclear from the claims and the Specification whether the diffuser is in addition to the inorganic oxide present in

Art Unit: 1773

the epoxy base layer recited in claim 1 or if the diffuser is in place of the inorganic oxide recited in claims 1. Appropriate clarification or amendment is required.

### ***Response to Arguments***

3. Applicant's arguments regarding the rejection of claims 1-7, 9-14, 16-32, 34-44, and 46-48 under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement, have been fully considered and are persuasive. The amendment of the phrase "a resin sheet containing dispersed particles" with "a liquid crystal cell substrate" is not deemed to be new matter given that the Applicants specifically point to page 62, lines 16-19 of the Specification (i.e., original disclosure) which states that "the resin sheets containing dispersed particles produced in Examples 1 to 26 and Comparative Examples 1 and 2 were used as liquid crystal cell substrates to fabricate liquids crystal displays".
